“Extension Activity on first-aid kit box”

REPORT

Date:-11/02/2019

Physics department had organised importance of A first-aid kit box on 11/2/2019 12.00am for girl school in their class. The program started by giving importance of a first-aid kit box form our students. Like A **first-aid kit** is a bag or case containing basic medical supplies that are designed to be used on someone who is injured or who suddenly becomes ill. Almost everyone will need to use a first aid kit at some time. Take the time to prepare a kit to have available for home and travel. First_aid kits may be basic or comprehensive. What you need depends on your medical training and how far you are from professional medical help Ready-made first aid kits are commercially available from chain stores or outdoor retailers. But you can make a simple and inexpensive first aid kit yourself.

Be prepared to take enough medication to last at least as long as you may be travelling (or for a few days more in case of delays). Carry your medical information with you. In case of emergencies when first aid is only the beginning of care, people should be prepared to give emergency personnel all of their current and past medical history The student form T.Y.Bsc demonstrated the importance of A first-aid kit box there were 26 girl were attending the program.
