Recycling of Garden Waste by Vermicomposting Method
Report (2020 – 21)

Date – 02/04/2021

Department of Zoology organized workshop of **Recycling of Garden Waste by Vermicomposting Unit**. The aim of this workshop is **to recycle garden waste to compost**. Increased urbanization and drastic growth of population have caused a severe increase of the solid waste around us and educational campuses. Waste generated in educational campuses may contain biodegradable material like paper pieces, garden waste, canteen waste, fallen leaves and non-biodegradable materials like plastic, glass, metals and electronic waste. Improper dumping, burning of solid waste causes environmental pollution. In this workshop, campus and garden waste is recycled with the help of vermicomposting technologies.

For the workshop **37 students** were present & **03 faculty members**. Out of **37** students **22 were girls** and **15 were boys**. Copy of List of students and teachers attendance along with their signs is attached to the report.
