Best Practice -II

1. Title of the Practice: "Promoting Scientific Temper through Artistic Expression: Scientific Theme-Based Rangoli"

2. Objectives of the Practice

1. To cultivate scientific temper and creativity among students.
2. To provide an innovative platform for integrating science and art.
3. To enhance students' understanding of scientific concepts through visual representation.
4. To foster teamwork, collaboration, and cultural expression.

3. The Context

Scientific awareness and creative thinking are critical in holistic education. The challenge lies in bridging the gap between theoretical knowledge and practical understanding while making it engaging. Using Rangoli as a medium not only celebrates cultural heritage but also transforms scientific concepts into visually appealing designs, encouraging broader appreciation and comprehension of science.

4. The Practice

The Rangoli activity provides a creative platform for students to explore and showcase scientific concepts through art. A specific scientific theme, such as space exploration, the periodic table, environmental sustainability, is thoughtfully chosen to inspire and engage participants.

Students are organized into teams and given a detailed briefing about the selected theme. Each team conceptualizes and designs their Rangoli using eco-friendly materials such as colored powders, flowers, or seeds, emphasizing sustainability. Their designs must include a title and a concise explanation of the scientific principle they depict, bridging the gap between creativity and education.

During college events like science fairs, cultural festivals, teams proudly present their Rangoli. This platform not only highlights their artistic ingenuity but also demonstrates their understanding of scientific concepts. Judging is based on innovation, scientific accuracy, aesthetic appeal, and teamwork, encouraging students to excel in multiple domains.

This activity fosters a unique blend of science and art, enhancing critical thinking, collaboration, and environmental consciousness. By transforming complex scientific ideas into visually captivating art, it deepens students' understanding while promoting cultural and academic enrichment in an engaging and memorable way.

5. Evidence of Success

- Enhanced participation in science-related activities.
- Positive feedback from expert's assessors and visitors.
- Improved understanding of scientific concepts among students, as evidenced by their ability to explain their Rangoli designs.
- Recognition and awards won by students at intercollegiate competitions showcasing scientific Rangoli.

6. Problems Encountered and Resources Required

- Ensuring the scientific accuracy of the concepts.
- Managing time constraints during preparation.

- Procuring eco-friendly and cost-effective materials.

Resources Required:

- Colored powders, biodegradable materials, and other art supplies.
- Access to scientific experts or faculty for validating concepts.
- Space for creating and displaying Rangoli.

REPORT ON SCIENTIFIC RANGOLI COMPETITION

Date of Event: 13th January 2024

Organized by: Geography Department

Venue: Geography Department

Time: 10:30 am to 12: 00 pm

The **Scientific Rangoli Competition** was held on **13th January 2024** under the auspices of the **Geography Department**. The event aimed to promote creativity and scientific thinking among students through the traditional art form of Rangoli, with a special focus on scientific themes. The competition was open to all students of the Geography Department, and it saw enthusiastic participation.

Event Details:

The event was held at geography department, and it began at 10:30 am .The students were given a theme related to geography, science, or nature, and they were required to create Rangoli designs that reflected scientific concepts, geographic features, or environmental awareness. The competition allowed participants to express their artistic talent while incorporating scientific knowledge into their designs.

Participation:

A total of 16 students participated in the competition, showcasing a wide range of innovative and vibrant Rangoli designs. Each participant worked on their Rangoli using various colors, patterns, and materials, adhering to the competition's guidelines. The Rangolis reflected themes such as climate change, renewable energy, biodiversity, and natural disasters.

Judges:

The competition was judged by M.P.College Pimpri pune-17, Botany Department head, Prof. Swapna Hajare and M. P. College Pimpri pune-17, Zoology Department mrs. Ashwini A. Mohite . The judges evaluated the designs based on creativity, adherence to the theme, color combination, and the overall scientific accuracy and presentation.

Prize Distribution:

At the end of the competition, the following winners were announced:

1. **First Prize:** Sayali Kamble
2. **Second Prize:** Gayatri Mandekar
3. **Third Prize:** Arti Gorekar

Additionally, participation certificates were distributed to all the students who took part in the competition.

Conclusion:

The **Scientific Rangoli Competition** proved to be an excellent platform for students to combine their artistic skills with scientific knowledge. The event not only encouraged creativity but also helped raise awareness about various scientific issues in a fun and engaging manner. The Geography Department is proud to have organized such a successful event and looks forward to more such initiatives in the future.
