4. The practice

The education sector in India, which was hitherto slow to change, has been witnessing a massive transformation recently with changing job landscape, technological disruptions, demand for quality education and the implementation of National Education Policy (NEP) 2020. In India, around 250 million students were affected due to college closures at the onset of lockdown induced by COVID-19. The pandemic posed several challenges in colleges which included an expected rise in dropouts, learning losses, and increase in digital divide. The pandemic also called into question the readiness of the systems, including teachers to address such a crisis and sustainability of college. However, COVID-19 also acted as a catalyst for digital adoption in education. The pandemic caused further shocks to the system with colleges forced to shut down during the lockdown period, and the transition of students and teachers to online teaching-learning.

Considering the need of the student, Mahatma Phule Mahavidyalaya, Pimpri immediately started moving towards online mode. The first Zoom meeting of the college was held on March 25, 2020, using Technology

Enabled System. This was the first step taken by Hon'ble Principle DR.Pandurang Gaikwad towards online mode with view to working in a positive manner without getting exhausted during the Corona crisis.

In the academic year 2020-21, the educational journey of the college made dynamic by organizing various student- centered activities, various meetings, national – international webinars etc. on the online platform. This has benefited the college students, Teachers, Alumni, Parents and various stakeholders in the society.
